Professional Summary

Software Engineering Technology student with experience developing applications and web-based projects using Python, Java, C#, HTML5 and CSS. Additional experience using Git, Docker, and Linux-based development environments. Currently learning the foundations of React, Node.js, and Express.js. Strong problem-solving skills, a passion for software development, and a willingness to learn new technologies. Seeking opportunity to apply my technical skills, gain hands-on experience, and contribute to a professional development team.

Technical Skills

Programming Languages: Python | Java | Javascript | C#

Web Technologies: HTML5 | CSS | React | Node.js | Express.js

Databases & Query Languages: SQL | MySQL

Development Tools: Visual Studio Code | Eclipse IDE | SQL Developer | Docker | Git | Github

Other: UNIX/Linux | WSL

Projects

Squish the Bug - Javascript Game

HTML | CSS | Javascript

- Developed an interactive browser-based game using HTML, CSS, and Javascript
- Utilized HTML5 Canvas API to render graphics, backgrounds, and dynamically generated sprites.
- Designed a progressive difficulty system that adjusts game speed based on player performance, with reset functionality.

Person Class - C# Console Application

C# | .NET | OOP

- Developed a C# console application using object-oriented programming.
 - Implemented object instantiation and attribute management through Main().
 - Created a GetFullName() method using string interpolation and data formatting to generate formatted object output.
-

Work Experience

March 2026 - Sept. 2026

Taxpayer Services Agent (Contract) | Canada Revenue Agency | Hamilton, ON

- Assisted in MyCRA account sign-in and registration issues with taxpayers by identifying error codes through internal systems
 - Utilized internal software to review and navigate taxpayer account information following required security verification procedures, while maintaining strict confidentiality of protected information.
 - Analyzed taxpayer inquiries to determine the appropriate resolution or line of business, efficiently routing cases and communicating relevant information and next steps.
 - Handled an average of 30 taxpayer interactions per shift, applying established procedures and problem-solving skills while maintaining operational and service standards.
-

June 2020 - March 2026

Dispatcher & Sales Lead Coordinator | Right-Time Group of Companies | St. Catharines, ON

- Utilized a SaaS-based dispatching platform to coordinate technicians and sales personnel, manage schedules, and service requests to support daily operations.
 - Processed and prioritized multiple service requests simultaneously, using dispatch software and operational data to coordinate resources and respond to time-sensitive scheduling requirements.
 - Scheduled field service calls and generated estimate appointments for sales teams, accurately transferring information between technicians, customers, and sales representatives.
 - Trained employees on software-supported workflows for Dispatch, Sales Lead Coordination, and Call Taking, providing guidance on system processes, task prioritization, and operational procedures.
-

Education

Centennial College - Toronto, ON

Software Engineering Technology - Advanced Diploma

Expected Graduation: Dec. 2028

Relevant Coursework: Advanced Database Systems | Web Application Development | Java Programming | Software Systems Design | Programming | UNIX/Linux Operating Systems
